

CARROT CRUSADER

Game Design Document

Version 1.0.0

Written by: Muhammad Bagoes Wicaksono / pyoyoww

1. Overview

1.1 Pitch

Carrot Crusader is a chaotic 2D action arcade shooter where you play as a carrot — not just any carrot, but a helmet-wearing, bow-wielding warrior with one goal: survive the rabbit apocalypse.

1.2 Genre

Action, Survivorlike, Arcade, Shooter.

1.3 Theme

Cute and chaos.

1.4 Target Platform & Audience

Platform	Windows (PC)
Audience	Casual gamers

1.5 Concept

Chaotic top-down arcade shooter where you play as a carrot knight fighting the endless waves of aggressive bunnies. Survive as long as possible get kill streaks to boost the score multiplier and collect health packs to stay alive.

2. Core Gameplay

2.1 Core Loop

1. Player spawns in
2. Waves of enemies appear
3. Player defeats enemies to gain points
4. Player collects health packs to survive longer
5. Loop continues until player dies

3. Game Systems

Enemies

- Visually styled as aggressive bunnies.
- Constantly move toward the player and attack on contact.
- Each enemy deals low damage individually, but swarms deplete health fast.
- Number of enemies increases over time, creating escalating difficulty.

Weapons

- The player uses a bow to fight off enemies.
- Aiming is done with the mouse, shooting with left click.
- No reload or power-up system in the current version, keeping combat fast and simple.

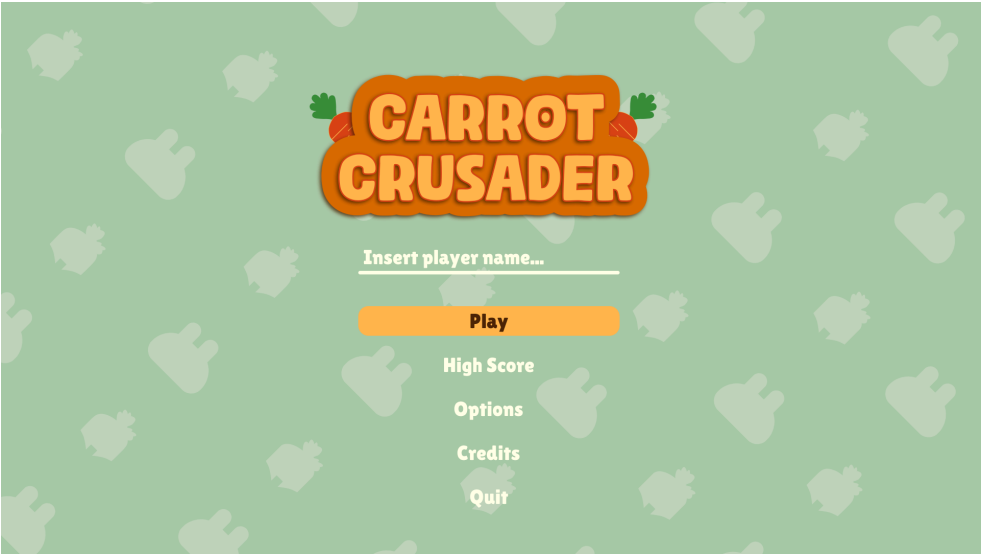

Health System

- Player begins each run with full health.
- Health is reduced on contact with enemies.
- Health packs spawn near the player every 30 seconds.
- Each health pack restores 25% of maximum health.

Score System

- Players earn 100 points per enemy defeated.
- A kill-based score multiplier scales from x1 up to a maximum of x5.
- Taking damage resets the multiplier back to x1.
- Final score is added to the high score list shown in the main menu.

4. UI Design

#	Screen
1	Title Screen — logo and Press any key prompt  The title screen features a green background with a repeating pattern of small, light green footprints. In the center, the game title "CARROT CRUSADER" is displayed in a large, orange, bubbly font with a 3D effect. Two small red carrots with green leaves are positioned on either side of the title. Below the title, the text "Press any key" is written in a simple white font.
2	Main Menu — player name input, Play, High Score, Options, Credits, Quit  The main menu screen has the same green footprint background. The "CARROT CRUSADER" logo is at the top. Below it is a text input field with the placeholder "Insert player name...". Underneath the input field is a large orange button labeled "Play". Below the "Play" button are five menu options listed vertically: "High Score", "Options", "Credits", and "Quit".
3	Options Menu — graphics (window mode, resolution), sound sliders, key rebinding
